You may be eligible to receive technical and financial assistance from USDA's Natural Resources Conservation Service to improve water quality on your land through the Environmental Quality Incentives Program Water Quality Initiative. Assistance is available in the Upper Fifteen Mile Creek area to help you implement the following conservation activities to improve water quality on your land:

- Irrigation Sprinkler Systems
- Soil Moisture Monitoring
- Nutrient Management
- Conservation tillage
- Cover Crop
- And other practices to improve irrigation water management

Contact your local NRCS field office to learn more about how NRCS can help you improve water quality.
